**Carpal Tunnel Syndrome Prevention:** Neurologists recommend alternating instrument handle sizes as one means of reducing stress. Larger diameter handles (#6, #7, #8 and #9) help lighten instrument grasp. Using a combination of various handle sizes plus a more relaxed grasp can help lessen the severity of the symptoms of Carpal Tunnel Syndrome.

Source: Gerwatowski, L.J., McFall, D.B., Stach, D.: Carpal Tunnel Syndrome; Risk Factors and Preventive Strategies for the Dental Hygienist. Journal of Dental Hygiene, February 1992.

## HOW TO USE THIS SECTION

|                                  |   |
|----------------------------------|---|
| Instrument Name & Pattern        | 11/12<br>Scaler                           |
| Part Code of pictured instrument | SM11/127                                  |
| Available handle designs         | Handle options: #2,<br>#4, #6, #7, #8, #9 |

See index for all available part codes of a specific pattern.

### STAYS SHARPER LONGER

The revolutionary stainless steel alloy is super-durable and stays sharper longer so the clinician can spend less time sharpening.

### PROPRIETARY PROCESS

Our proprietary processing ensures that the superior edge retention and wear characteristics of EverEdge Technology will last the entire life of the instrument. Since EverEdge is not a superficial coating, the instruments can be resharpened like any other scaler.

### DIAMOND KNURL

The unique diamond knurl pattern on the large diameter handle provides a confident and comfortable grasp. The #9 EverEdge handle was also designed to be the optimal weight for reduced hand fatigue.

### COMFORT ZONE CONE WITH SIGNATURE SERIES GRIP

The cushioned grip provides a smooth transition and increased comfort. With distinctive Ocean Blue grips, EverEdge scalers can be easily identified in a set up.

### FINELY-HONED FINISH

EverEdge Scalers feature a hand-crafted finish from Hu-Friedy's professional artisans that keeps edges effectively sharp and allows for efficient scaling.

“As an educator, I always recommend Hu-Friedy's EverEdge instruments to my dental hygiene students. When well maintained, they can be sharpened so quickly and easily. A real advantage of the fine sharp cutting edge is **less hand fatigue for the hygienist and better comfort for the patient**, so both the clinician and patient can feel the benefits of EverEdge.”

– JILL NIELD GEHRIG, RDH, MA  
Dean Emeritus, Division of Allied Health

“Throughout my career, I was always the delegated instrument sharpener. I accepted this role eagerly because I knew how important it was for the patient and for the clinician to use a sharp edge during instrumentation. Life is too short and your clinical day is filled with important obligations, the **EverEdge is a lifesaver.**”

– CHERYL THOMAS, RDH

# SICKLE SCALERS

Designed for the removal of supragingival calculus

**H6/H7 Hygienist**  
| SH6/79

Handle options: #2, #4, #6, #7, #8, #C8, #9  
Super-thin, contra-angle design is for interproximal areas. Shank angulation provides accessibility to all anterior and premolar surfaces.

**H5/33 Hygienist-Jacquette**  
| SH5/339

Handle options: #2, #4, #6, #7, #8, #C8, #9  
Super-thin sickle scaler combined with a straight sickle blade. For scaling interproximal and cervical areas of anterior teeth.

**H5/U15 Hygienist-Towner**  
| SH5/U156

Handle options: #2, #4, #6

**6/7 Goldman**  
| SH6/76

Handle options: #2, #4, #6, #7, #8  
Shortened blade version of H6/H7.

**U15 Towner**  
| SU156

Handle options: #24, #6, #7, #8

**U15/30 Towner-Jacquette**  
| SU15/309

Handle options: #2, #4, #6, #7, #8, #C8, #9

**U15/33 Towner-Jacquette**  
| SU15/339

Handle options: #2, #4, #6, #7, #8, #C8, #9

Some scalers and curettes are available in an American Dental Classic style that is slightly more rigid in design, with a 5/32" working end. They are offered exclusively in ResinEight® handles. Contact your Hu-Friedy representative for specific part code availability.

## NEVI® SCALERS

**Nevi 1  
Anterior**  
| SCNEVI19

Handle options:  
#6, #7, #8, #C8, #9

An elongated disk end for anterior lingual stain and calculus removal paired with a super thin, anterior curved sickle.

**Nevi 1/H5  
Anterior**  
| SNEV1/H59

Handle options: #6, #7,  
#8, #C8, #9

An elongated disk end for anterior lingual stain and calculus removal paired with a larger H5 sickle – a thin curved blade for interproximal and cervical anterior areas.

**Nevi 2  
Posterior**  
| SCNEVI29

Handle options: #6, #7,  
#8, #C8, #9

A super thin posterior curved sickle scaler, the unique contra-angle design is great for interproximal reach and ergonomic hand positioning.

**Nevi 3  
Posterior**  
| SCNEVI39

Handle options: #C8, #9

Ultra slender, dual cutting blades provide effective placement in tight, narrow contacts and interproximal areas and precise access for effective removal of light-to-moderate deposits.

**Nevi 4  
Posterior**  
| SCNEVI49

Handle options: #C8, #9

Tapered dual cutting blades provide precise access for effective deposit removal and increased shank rigidity provides for effective removal of burnished, heavy and tenacious deposits.

## GOLDMAN-FOX SET

**GF-1  
Universal Scaler**  
| **SGF16**  
Handle options: #4, #6

For removing heavy supragingival and subgingival calculus; Useful on proximal surfaces and interproximal areas during periodontal surgical procedures.

**GF-5 Hoe  
Buccal/Lingual**  
| **SGF5**  
Handle: #4

For removing heavy calculus deposits

**GF-2  
Curette**  
| **SGF26**  
Handle options: #4, #6

Contour design for removal of calculus on anterior teeth and premolars

**GF-6  
Hoe**  
| **SGF6**  
Handle: #4

For mesial/distal surfaces of the posterior teeth or facial/lingual surfaces of the anterior teeth

**GF-3  
Curette**  
| **SGF36**  
Handle options: #4, #6

Same blade surface as GF-2, but specifically designed for the proximal surface of the posterior teeth.

**GF-21**  
| **SGF21**  
Handle Options: #4, #6

Sharp spoon on one end is for debridement in curettage procedures. Small scaler on the other end can be used with either a circumferential or vertical stroke.

**GF-4  
Curette**  
| **SGF46**  
Handle options: #4, #6

Additional bend in the shank for easier calculus removal in the molar region

**GF-21S/33  
Combination**  
| **SGF21S/33**  
Handle Options: #2, #4

Small end Goldman-Fox scaler with a #33 straight miniature Jacquette scaler

Handle options:  
#4, #6

Langer 17/18 for maxillary  
and mandibular posterior

## LANGER APPLICATION CHART

Standard  
Langer  
Curette

After Five<sup>®</sup>  
Curette

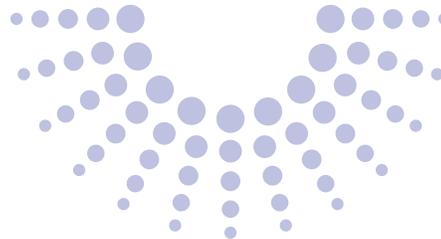

Mini Five<sup>®</sup>  
Curette

- After Five and Mini Five terminal shanks are elongated by 3 mm for access into deep periodontal pockets and root surfaces of 5 mm or more.
- Blade is 10% thinner than standard Langer to ease gingival insertion and reduce tissue distention.
- Mini Five has a reduced blade, half the length of the After Five or standard Langer, for better adaptation in narrow pockets and furcations.

Langer curettes have the shank design of a Gracey curette combined with a universal blade. These instruments can scale all surfaces.

# GRACEY CURETTES

Designed to adapt to a specific area or tooth surface.

## STANDARD GRACEY CURETTES

- Area-specific to allow for deep scaling, root planing and periodontal debridement
- Offset blade provides a perfect working angulation for the tooth surface
- Offset blade angulation means only the lower cutting edge of each blade is used

1/2  
(shown)

| SG1/29

Handle options: #2, #4,  
#6, #7, #8, #C8, #9

1/2  
Rigid

| SG1/2R9

Handle options: #2, #4,  
#6, #7, #8, #C8, #9

Extra Rigid

| **SG13/14ER8**

Handle options:  
#4, #6, #7, #8

Angulated to reach distal surfaces of posterior teeth

15/16<sup>+</sup>  
(shown)

| **SG15/169**

Handle options: #2, #4,  
#6, #7, #8, #C8, #9

15/16  
Rigid

| **SG15/16R9**

Handle options: #2, #4,  
#6, #7, #8, #C8, #9

Same shank bends as 13/14, but blade positioned to reach mesial posterior surfaces

17/18

| **SG17/189**

Handle options: #2, #4,  
#6, #7, #8, #C8, #9

17/18  
Rigid

| **SG17/18R9**

Handle options: #2, #4,  
#6, #7, #8, #C8, #9

Accentuated angles improve access to distal posterior surfaces. The 17/18 also has smaller blade and slightly longer terminal shank.

\*Area-specific curettes also available in Kramer-Nevins and Turgeon designs.

The Rigid Gracey has a thicker, stronger, and less flexible shank than the standard Gracey. This allows for removal of moderate to heavy calculus.

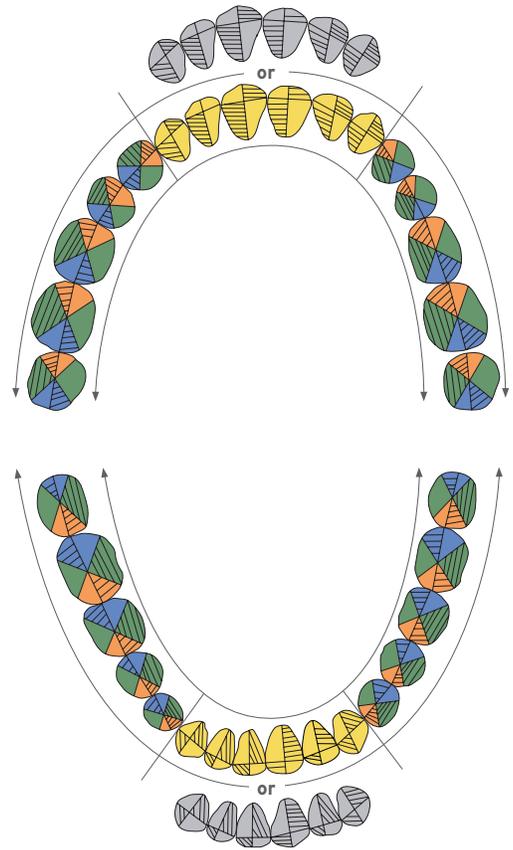

# GRACEY CURETTES

## DESIGN COMPARISONS

Refer to the chart to match instruments with area of application by using the color-coded diagram below.

| Gracey Type          | Shank Design & Diameter                   | Blade Length     | Blade Width                            | Available Patterns & Area of Use                            |

### HU-FRIEDY THINNING SERVICE

Most scalers and currettes (except After Five® and Mini Five®) can be thinned to create an extra fine blade. Add TSDE to double-end or TSSE to single-end to the original part code.

## AFTER FIVE® GRACEY CURETTES

Designed to adapt to a specific area or tooth surface.

- Terminal shank is 3 mm longer than Standard Gracey
- Longer terminal shank allows better access to deep pockets and areas with recession
- Blade is 10% thinner than standard Gracey curette to allow for less tissue distention when accessing deeper pockets

Terminal shank redesigned to be 3 mm longer than a standard Gracey curette

Gracey After Five curette reaching deep into a pocket

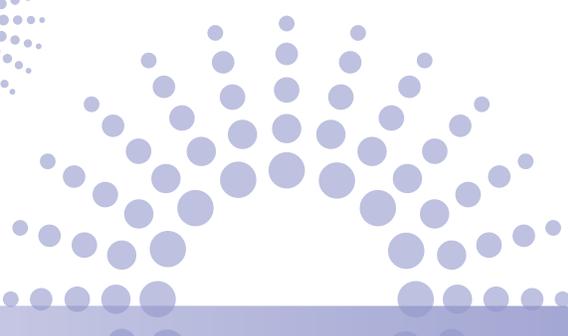

## MINI FIVE® GRACEY CURETTES

- Terminal shank is 3 mm longer than Standard Gracey
- Compared to the standard Gracey curette, blade is 50% shorter and 10% thinner
- Good for scaling in deep, narrow pockets

Mini Five reaching into a deep pocket on a narrow root

# GRACEY CURETTES

## MICRO MINI

- Longer terminal shank designed to access deep periodontal pockets
- Compared to the standard Gracey curette, blade is 50% shorter for better adaptation in narrow pockets and furcations
- Blade is 20% thinner than a Mini Five Gracey to help reduce tissue distension and ease gingival insertion

## THE CLAYTON GRACEY STORY

In the late 1940s, an innovative dentist from the University of Michigan had a vision. Clayton Gracey wanted to **"give every dentist the possibility to treat even the deepest and least accessible periodontal pockets simply and without traumatic stretching of the gingiva."**

Dr. Gracey brought his idea to Hugo Friedman, the founder of Hu-Friedy, who supported his concept. Together they developed a series of 14 single-ended area-specific instruments for the successful removal of deposits from root surfaces.

Dr. Gracey's designs laid the groundwork for the new instruments of today. Currently, Gracey curettes are available as double-ended instruments with multiple handle choices.

The Gracey curettes have come a long way since the original design. Hu-Friedy currently manufactures a variety of styles and patterns, such as After Five® curettes with a longer terminal shank and thinned blade, Mini Five® curettes with After Five® features and a shorter blade, and the 15/16 and 17/18 patterns. An optional Rigid shank is available on all of the Gracey designs.

Hu-Friedy is continually looking for new ways to improve our existing products. Our success is dedicated to the pioneers in dentistry, including Dr. Clayton Gracey, who helped to make a vision become not only a reality, but also a part of every dental office today.

## RESIN 8 COLORS

Hu-Friedy's Resin 8 Colors are ergonomic, lightweight and offer a color-coding system based on specific areas of the mouth. Plus, each scaler and curette features Hu-Friedy's proprietary EverEdge® technology, which keeps the working ends sharper longer. See the full list of Resin 8 Colors part codes on page D26.

# AREA-SPECIFIC CURETTES

Designed to adapt to a specific area or tooth surface.

## VISION CURVETTES

- 50% shorter, curved blades
- 5 mm and 10 mm shank markings
- Blade identification mark (+) on handle
- Identification bands on handle: one band on 11/12, two bands on 13/14 (on #4 handle only)

**Curvette 11/12**  
**| SGC11/12**  
 Handle options: #4, #6  
 For mesial surfaces of molars  
 Improved adaptation into furcations

**Curvette 1/2**  
**| SGC1/2**  
 Handle options: #4, #6  
 For anterior and premolar surfaces, and interproximal areas

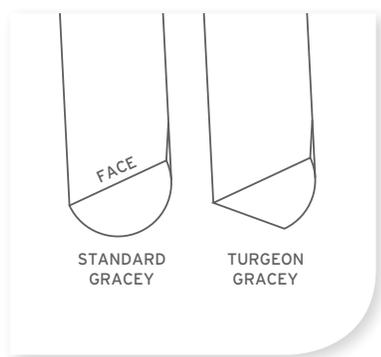

**Curvette Sub-Zero**  
**| SGCSUB-06**  
 Handle options: #4, #6  
 Long shank reaches deep into the sulcus, adapting to the facial and lingual root surfaces

**Curvette 13/14**  
**| SGC13/14**  
 Handle options: #4, #6  
 For distal surfaces of molars  
 Improved adaptation into furcations

## TURGEON MODIFIED GRACEY CURETTES

- Blade is designed to produce a different cross section of blade angulation
- Modified shape provides a sharper blade
- Modified shape is easy to sharpen.
- Blades are narrow for ease of insertion

# AREA-SPECIFIC CURETTES

## DEBRIDEMENT CURETTES\*

These unique currettes are used after ultrasonic scaling for gentle removal of residual deposits and for smoothing the root surface.

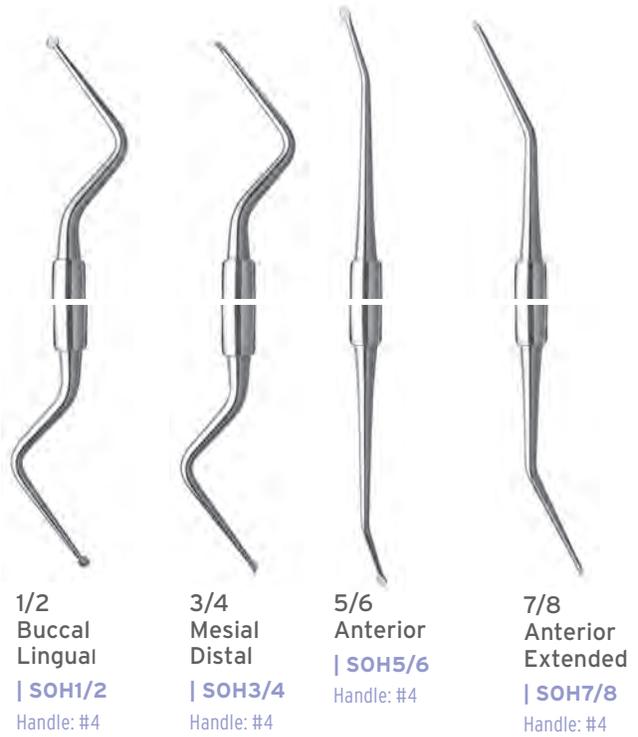

IDEAL FOR FURCATIONS, DEVELOPMENTAL GROOVES & LINE ANGLES

Entire edge of the blade is a cutting edge enabling a push or pull stroke in all directions - vertical, horizontal or oblique.

Shanks are extended for easy access into deep pockets.

## KRAMER-NEVINS CURETTES

- The Kramer-Nevins modified Gracey curette series is designed for root planing and subgingival curettage.
- Features slightly modified blade curvatures, thinner profiles, and extra length to help gain access to difficult areas without losing curette "bite."
- Most commonly employed during initial pre-surgical preparation, and with all maintenance patients.
- Also extremely useful during surgery.

# DISPOSABLE PROPHY ANGLES

Hu-Friedy Disposable Propy Angles feature ergonomic and design enhancements to improve clinical outcomes, reduce clinician stress and maximize patient acceptance. Available in standard straight and a 15° contra design with a choice of soft or firm cups, Hu-Friedy Disposable Propy Angles enable you to perform at your best with the quality, reliability and performance you've come to expect from Hu-Friedy.

## POINTS OF PERFORMANCE

- Inner spiral cup design with smooth exterior for superior paste delivery, greater interproximal reach and less splatter
- Precision-manufactured internal-drive components deliver reliable, smooth performance
- Proprietary grip for a light, secure grasp, greater rotational control and reduced hand fatigue

- Soft and firm cups meet clinician- and patient-specific requirements
- 15° contra angle style allows for a more comfortable, neutral wrist position
- Compatible with most common low-speed handpieces
- Not made with natural rubber latex

# INSTRUMENT SHARPENING

## SIDEKICK SHARPENER

The Hu-Friedy Sidekick sharpener is designed for routine maintenance sharpening of scalers and curettes. Correct routine sharpening helps extend instrument life.

- The Sidekick sharpener is cordless, for use anywhere in the dental office
- Instrument Guide Channels and Vertical Backstops are “template-like” guides that help control blade angulation, providing consistent results
- The Sidekick sharpener is compact and requires minimal space

### Sidekick Sharpening Kit

#### | SDKKIT

Kit Includes: Sidekick Unit, User Manual & CD-ROM, Ceramic Sharpening Stone, Plastic Test Stick, Magnifying Lens and 2 AA Batteries.

## DIAMOND SHARPENING CARDS

- A uniform coating of industrial diamonds bonded to high quality stainless steel provides an extremely hard, flat surface for instrument sharpening.
- Durable surface resists grooving and ditching; remains flat after repeated use and will not break or shatter if dropped.
- Easy clean-up via ultrasonic cleaner and steam sterilization.
- Thin credit-card size shape allows sharpening cards to readily fit into sterilization pouches or cassettes with procedural set-ups.

## SIGNATURE SERIES® GRIPS

Signature Series grips can only be used with Satin Steel Colours®, EverEdge® technology and ResinEight® instruments, and are used for identifying and organizing instruments. They're useful for maintaining proper instrument order in cassettes and identifying instruments by procedure. Grips will withstand all approved heat sterilization methods.

All single color packages contain 16 pieces. The assorted color packages contain your choice of either 16 or 80 pieces.

|                      |                               |

## ACCESSORIES & KITS

### Arkansas Stone Kit

| **SSKITA**

Includes: #4 Flat Arkansas Stone, #299 Conical Arkansas Stone, 5 Plastic Test Sticks, Sharpen-EZ Stone Oil, Magnifying Lens

### Ceramic Stone Kit

| **SSKITC**

Includes: #3 Ceramic Stone, Cylindrical Ceramic Stone, 5 Plastic Test Sticks, Magnifying Lens

### Sharpening Magnifying Lens

| **LENS**

### Sharpen-Ez™ Sharpening Oil 1-oz. Bottle (29.5ml)

| **SSO**

Medical-grade oil floats away metal particles and prevents damaging build-up on stone. Also decreases friction heat.

## MISCELLANEOUS

### Brush Handle 1

| **HCB1**

Used for pit and fissure sealant, acid etch, and placement procedures. Made of Immunity Steel® material to allow sterilization by autoclave. Design holds most manufacturers' brush inserts.

### Immunity Steel Pumice Cup, Modified

| **PCUPM**

Used to hold prophylaxis paste or medicaments. Made of corrosion resistant, acid-proof stainless steel.
